The following is an examiner's statement of reasons for allowance:

Van Dijk (USPN 5,177,144) discloses a process for converting natural gas to a normally liquid carbon containing compound, such as methanol and/or dimethyl ether. The method of the Van Dijk eliminates the need for steam reforming and/or adiabatic reforming with essentially pure oxygen with natural gas to form a synthesis gas. The synthesis gas may be produced at operating pressure suitable for conversion thereof to methanol and/or dimethyl ether without the need for synthesis gas recompression. However, the prior art of record neither teaches nor suggests supplying oxygen to the reactor through an air separation unit at an oxygen pressure greater than the operating pressure of the reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jafar Parsa whose telephone number is (571)272-0643. The examiner can normally be reached on 8 a.m.-4:30 p.m. (M-F).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on (571)272-0646. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
